2. Use Reflection File Transfer function to upload the file "DOORINST" to HP3000 using the LABEL format

3. Restore the tape as follows:
   ```
   :File T=DRINSTAL;Dev=disc
   :Restore *T;@.@.@;CREATE;SHOW=SHORT
   ```

4. After the file has been restored, execute the command file
   ```
   :DOORINST.PUB.IMAXSOFT
   ```

   This sets the proper security for the account and groups.

   DOOR account structure:

   1. Account access security required:
      (R,X:ANY;W,A,L:AC)
   2. Account capability required:

      (R,X:ANY;W,A,L,S:AC)
   4. PUB group capability required:
      BA,IA,MR,DS,PH,PM

   If you plan to initiate DOOR's interceptor and shooter processes outside the DOOR account, then you must set:

   CONFIG.DOOR group: ACCESS=(R,X,W,A,L,S:ANY)

Special Instructions:

Extra steps for installing ELOQUENCE OPENTURBO and DOOR:

```
You need to be sure that the library libelo3k.sl is point to the proper Eloquence IMAGE library:

The default symbolic link for libelo3k.sl is:

$cd /opt/imaxsoft/openturbo3.7/eloquence/lib
$ll libelo3k.sl
lrwxrwxr-x   1 root        sys             41 Jan 23 11:39 libelo3k.sl ->
/opt/eloquence6/lib/pa11_32/libimage3k.sl

If the default link points to an incorrect file, use following command to reset the symbolic link
for pointing to Eloquence IMAGE library that is installed on your system:

$cd /opt/imaxsoft/openturbo3.7/eloquence/lib
$rm libelo3k.sl
$ln -s /opt/eloquence6/lib/pa20_32/libimage3k.sl libelo3k.sl
```
